

HYBRID LEARNING TEACHER SURVEY

106 Responses

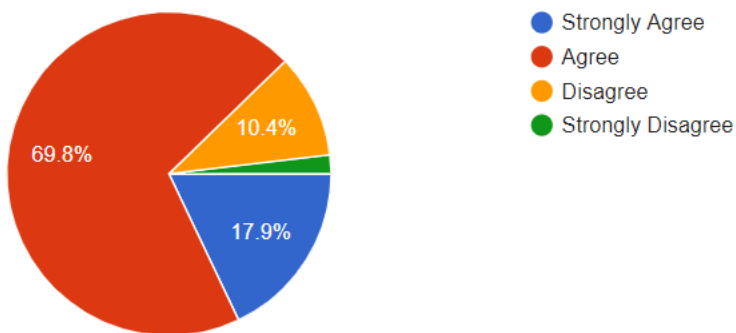

I am able to prioritize learning and essentially move through the same number of skills and standards in the hybrid model.

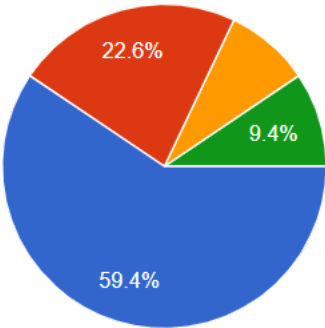

My students are able to work effectively on the home learning days, and are showing adequate progress toward meeting learning standards.

I am comfortable with my ability to plan for effective learning for my students on the home learning days.

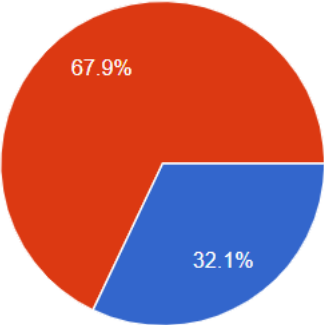

The hybrid model of learning makes me feel safer as a staff member with regard to mitigating the impact of the COVID-19 virus.

- Strongly Agree
- Agree
- Disagree
- Strongly Disagree

At this time, I support...

- Moving to a traditional model for all families who are comfortable to do so
- Remaining in the hybrid model of learning
